PROFESSIONAL SUMMARY

Software Testing fresher trained in manual and automation testing, with hands-on experience writing and executing test cases, test plans, and test scripts across web and API-based applications. Skilled in functional, regression, smoke, sanity, and integration testing, along with identifying, reporting, and tracking defects and validating fixes through retesting. Comfortable collaborating with developers to clarify requirements, documenting test results clearly, and assisting with automated test scripts.

TECHNICAL SKILLS

- **Manual Testing:** SDLC, STLC, Test Case & Test Plan Design, Functional, Regression, Smoke, Sanity, and Integration Testing, Defect Life Cycle, Retesting & Fix Validation, Requirement Traceability Matrix (RTM)
- **Automation Testing:** Selenium WebDriver (Java), TestNG, JUnit, Maven, Page Object Model (POM), Data-Driven Testing
- **API & Performance Testing:** Postman, Apache JMeter
- **Bug Tracking & Documentation:** JIRA, Test Result Documentation, Excel Reporting, Extent Reports
- **Database:** SQL, Data Validation
- **Version Control & Agile:** Git, GitHub, Agile/Scrum

TRAINING

Software Testing Trainee — Ubicsoft IT Solutions, Ernakulam

Aug 2025 – Jan 2026

- Wrote and executed 150+ test cases for web applications, covering functional and regression testing
- Performed end-to-end STLC activities including test planning, execution, defect reporting, and closure
- Automated web application test scenarios using Selenium WebDriver, TestNG, and Maven
- Collaborated with fellow trainees in group exercises to write, execute, and review test cases as a team

PROJECTS

OrangeHRM – Manual Testing

- Designed and executed 60+ test cases for Login, PIM, and Leave Management modules; identified and reported bugs
- Performed functional, regression, and integration testing; retested and validated bug fixes; maintained RTM for requirement coverage

ParaBank – Automation Testing

- Automated core banking functionalities (Registration, Login, Fund Transfer, Bill Pay) using Selenium WebDriver with Java
- Implemented Page Object Model (POM) for maintainable, reusable test scripts

BlazeDemo – Data-Driven Automation Framework

- Built a data-driven framework using Selenium WebDriver and Apache POI to read test data from Excel
- Automated flight search and booking workflows; documented results using Extent Reports

Flipkart – Performance Testing

- Designed and executed baseline, load, and stress testing scenarios using Apache JMeter
- Analyzed response time and throughput; documented performance test results

EDUCATION

Bachelor of Computer Applications (BCA)

2020 – 2023

School of Technology and Applied Sciences, Kottayam

CERTIFICATION

AI Integrated Full Stack Software Testing

Aug 2025 – Dec 2025

STC Technologies, Ernakulam

Software Testing (Grade A+)

Jan 2026 – Mar 2026

NACTET, New Delhi

SOFT SKILLS

Analytical Thinking | Attention to Detail | Problem Solving | Communication | Team Collaboration | Adaptability
